**Type 2 Diabetes**

*Established Research report* on 11 reported markers, updated *March 24th, 2011*

**Stylianos Antonarakis**
4.9 out of 100
men of European ethnicity who share Stylianos Antonarakis's genotype will develop Alzheimer's Disease between the ages of 50 and 79.

**Average**
7.2 out of 100
men of European ethnicity will develop Alzheimer's Disease between the ages of 50 and 79.

**Alzheimer's Disease**

*Established Research report* on 1 reported marker.

**Stylianos Antonarakis**
33.6 out of 100
men of European ethnicity who share Stylianos Antonarakis's genotype will develop Type 2 Diabetes between the ages of 20 and 79.

**Average**
25.7 out of 100
men of European ethnicity will develop Type 2 Diabetes between the ages of 20 and 79.
paternal line

Your Y chromosome DNA determines your paternal haplogroup. What is a haplogroup?

Paternal Haplogroup: E3b1a

Locations of haplogroup E3b1a circa 500 years ago, before the era of intercontinental travel.

E3b is most common in northern Africa and southern Europe. It arose about 17,000 years ago in eastern Africa and spread into the Mediterranean region after the Ice Age. E3b1a, a subgroup of E3b, expanded out of the Near East 8,000 years ago into northern Africa and southern Europe. Today it is one of the most common haplogroups in those regions.
